

The solution for gas **scheduling** and **transportation** management

pipeline transporter®

for gas pipelines

PipelineTransporter® for gas is successfully helping transportation companies manage their business processes by linking commercial, operational and accounting data.

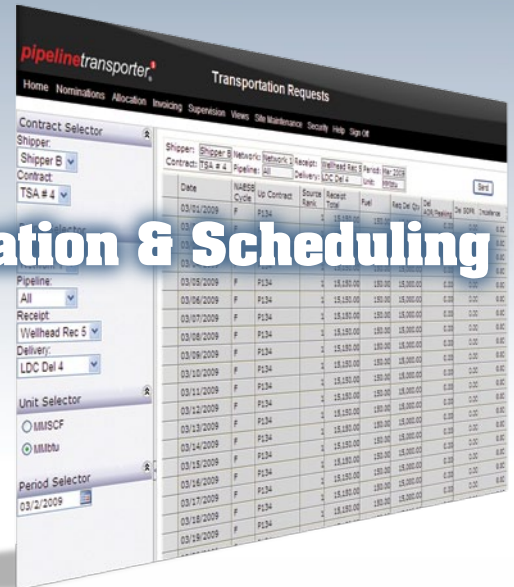

Easy to Use: Simplified data set up allows rapid implementation while comprehensive web reporting makes information widely available in real time.

Integral: Complete the logistics cycle and integrate business in real-time. Accept nominations, publish schedules, monitor delivery points, perform allocations and create invoices in a single environment.

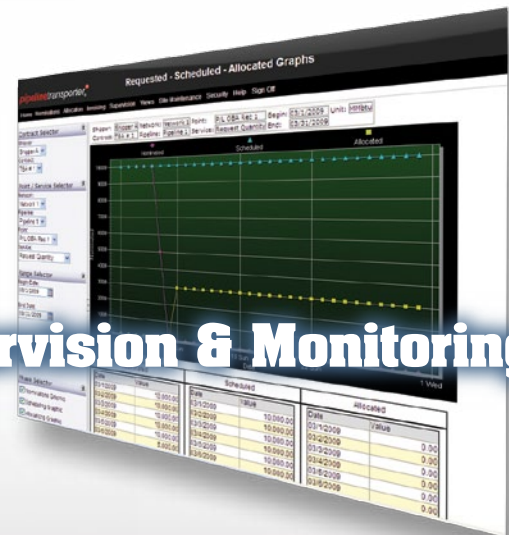

Versatile: Use the Windows client/server application for your back office processes. Use the web browser interface to share data with customers and business partners, anywhere, anytime.

Connected: Easy integration with SCADA or other measurement systems. SAP-Certified interface. Coupled with PipelineManager® or PipelineStudio® for hydraulic validation.

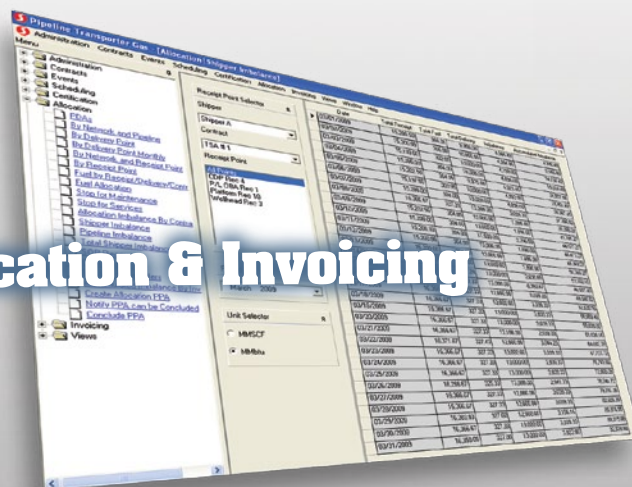

Nomination & Scheduling

Supervision & Monitoring

Allocation & Invoicing
