

The *real-time* solution for an integrated **Order-to-Cash** process

# synthesis<sup>TM</sup>

for marine

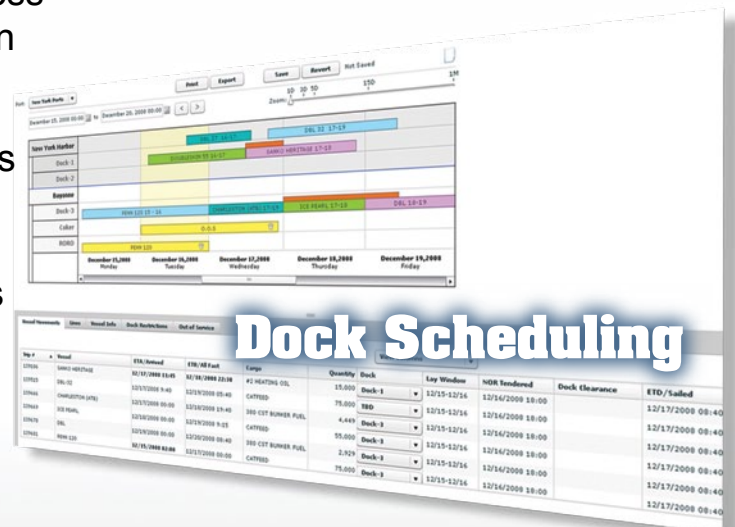

*Synthesis<sup>TM</sup> for Marine will help you decrease demurrage cost, increase operating accuracy and efficiency, improve communications with business partners and satisfaction with customers. All in real-time through an easy to use web browser interface.*

**Demurrage Management:** Increase your real time visibility and avoid problems that can cause delays before and during the vessels stay. Have a detailed record of exactly what happened. Less demurrage costs alone can bring you an ROI in months.

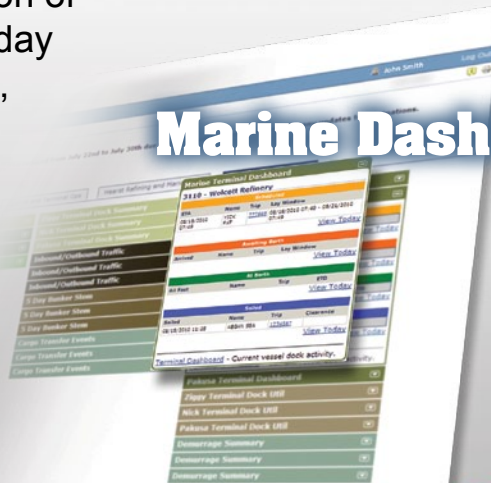

## Demurrage Management

**Reduced Vessel Turnaround Time:** Synthesis orchestrates the complete port life cycle of the vessel. We track in real time all key events, equipment availability, compliance, inspections and lab analysis. Measure volumes, calculate fees and all other aspects of the port lay.

**Increased Operating Efficiency:** Improved consistency, responsiveness and visibility of processes through the integration of vessel & dock scheduling to your day to day operations. Dock operators, port captains and all marine personnel have access to event data as it happens.

## The Right Solution

As marine terminal operators, delays in vessel arrival or turnaround times have effects that ripple across your entire supply chain and that of your customers. As stockholders and traders, your own production or blending delays can affect schedules, and your customers are relying on you. Either way high demurrage and opportunity costs result. Synthesis for Marine was designed to directly tackle these problems.

## Capabilities

- Customer Inventory & Service Orders
- Visual Dock Scheduling
- Integrated Vessel Scheduling
- Inventory Management
- Contract and Deal Sheet
- Document Management and Reporting
- Billing & Invoicing
