

The *real-time* solution for an integrated **Order-to-Cash** process

# synthesis™

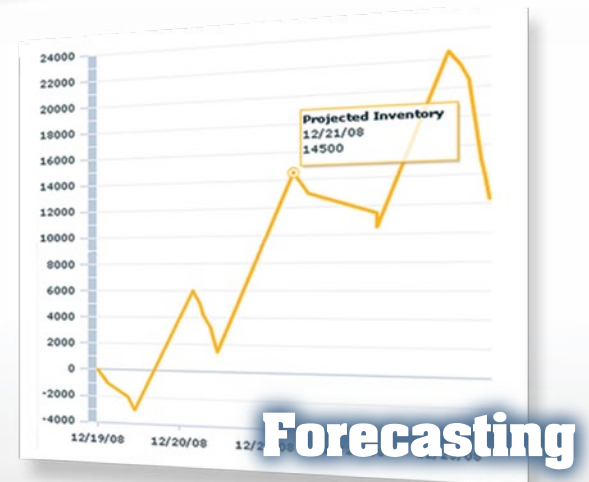

for terminals

Synthesis™ for Terminals will help you increase revenue, unlock operational efficiencies, and provide your customers and business partners better value and responsiveness, all in real-time through a simple and intuitive web browser interface.

**Increase Operational Efficiency:** Improved consistency, quality and visibility of operations through the integration of existing data collection systems (TAS/PLC) combined with the analytical capabilities of Synthesis™ which results in increased operating efficiency.

**More Accurate Forecasting:** Quicker, more precise decision making as a result of real-time visibility into rack lifting activity at each terminal and access to transportation forecasts.

**Reduce Costs:** By integrating transportation schedules with terminal operations data, an optimal replenishment forecast is created to give you the tool for making the right purchasing and transportation decisions.

**Interactive Scheduling**
