

Managing *purchase* and *sale* transactions efficiently and effectively

transactionmanager®

for gas pipelines

TransactionManager® allows pipeline and marketing companies of all sizes to manage and maintain their purchase and sale transactions regardless of complexity.

Easy to Use: Simplified data set up allows rapid implementation while comprehensive web reporting makes information widely available in real time.

Integral: Capture pipeline purchases, sales and transports in one integrated application. Accept nominations, publish schedules, perform allocations and create invoices in a single environment.

Versatile: Use the Windows client/server application for your back office processes. Use the web browser interface to share data with customers and business partners, anywhere, anytime.

Connected: Easy integration with SCADA or other measurement systems. SAP-Certified interface. Coupled with PipelineManager® or PipelineStudio® for hydraulic validation.
